

First things first, I think that this website haven't been designed/created yet. So, by looking at this website design I think we should go for custom website development. Therefore,

Task	Duration
Front Home page	1-2 days
Front Home page backend functionality	1-2 days

For now, these are the observations that I observed for this website.

Also, I am going start designing the front home page that u sent me, and then I will send u demo for the site.

If you have any kind of queries/questions/objections/suggestions please let me know.
